Breast Ductoscopy For The General Surgeon Course To Include New Product

Postgraduate surgeons will be given the skills to use the MammoView™ Product Line when Performing Breast Ductoscopy at American College of Surgeons Clinical Congress

BOSTON, Oct. 7 /PRNewswire-FirstCall/ -- Solos Endoscopy, Inc. (Pink Sheets: SNDY) is pleased to announce that its MammoView™ line of surgical endoscopy instruments will be demonstrated at the 95th Annual American College of Surgeons Clinical Congress, held October 11th-15th in Chicago, IL.

During the Breast Ductoscopy for the General Surgeon course, postgraduate surgeons will be given lectures and access to hands-on skill stations that will provide the core knowledge base required to perform breast duct endoscopy (ductoscopy) in the practice setting. Four of the six offered skill stations, during this course, will feature the MammoView™ line of surgical endoscopy instruments.

The Clinical Congress of the American College of Surgeons continues to remain the premier U.S. annual surgical meeting that provides a vast array of educational and networking opportunities. Programs at the Clinical Congress are developed to advance surgeons' ongoing efforts to achieve the best clinical outcomes for their patients. This year's Congress will feature 116 panel sessions, video-based education selections, and hundreds of scientific exhibits and technical exhibits from a wide variety of companies. The

Skills-Oriented Postgraduate Courses will focus on important domains and help attendees advance their knowledge and acquire new skills. Experiential, hands-on learning will be used to achieve the course objectives.

"We are proud to have our MammoView™ line of surgical endoscopy instruments demonstrated at the 95th Annual American College of Surgeons Clinical Congress and are excited by the exposure it will receive. As more doctors become familiar and educated in using our product line, when performing breast ductoscopy, we believe that this can only result in an increased demand for the MammoView™ line," stated Bob Segersten, President of Solos Endoscopy, Inc.
