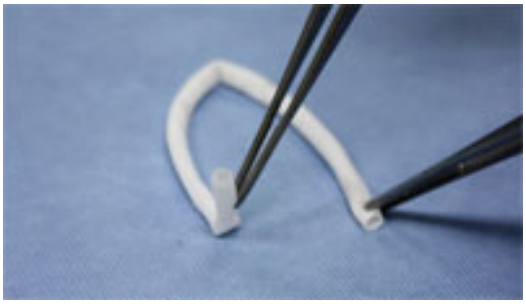
Life-Like Suturing Training Models



3-Dmed®, makers of the Minimally Invasive Box Training System (MITS) & Accessories introduces LifeLike BioTissue High-fidelity product line for laparoscopic and open suturing skills training. The LifeLike BioTissue Models include*:*

- Femoral Artery
- Saphenous Vein
- Thoracic Aorta
- Cardiac & Vascular Anastomosis Kit
- Bowel
- Micro Vessels
- Double-Layer Skin

According to the company, LifeLike BioTissue Models are ideal for use in Basic & Procedural Hand Suturing - Vascular Anastomosis, Bypass, Coronary Anastomosis, Bowel Anastomosis, Microsurgery and Laparoscopic Suturing training. Features include:

- A real feeling with a wet surface and high water content
- The same mechanical properties of vessels they hold a stitch and suture like real vessels
- Latex- and oil-free
- Are oil free
- Require no refrigeration and have a long shelf-life
- Are reusable when kept in sealed packaging
- Ready for use – no need to freeze, thaw, remove odors, disinfect and prepare, you just need water
- Odor free
- Easy to dispose – no garbage expense or disposal issues
- Reusable
- A fraction of the cost of a live pig lab
- Practical, allowing you to use live animals for more complex, procedural and team-based skills learning
- Fluid pumps are also available for the evaluation of anastomosis skills, as

well as syringes and IV catheters for the evaluation of the quality of micro vessel anastomosis.
