ShelfMax™ Bins Offer Storage Options

Akro-Mils introduces three new sizes in the 6" high ShelfMax™ product line. New sizes include 11-5/8" L x 8-3/8" W x 6" H, 17-7/8" L x 8-3/8" W x 6" H, and 23-5/8" L x 6-5/8" W x 6" H.

Industry-leading, heavy-duty ShelfMax bins offer the best value in 6" high plastic storage bins. Now available in seven sizes and five colors, the 6" bins feature greater storage options for end users — including up to 85 percent more holding capacity than traditional 4" shelf bins, and a holding capacity that is up to 25 percent more than comparable 6" high storage bins.

Superior construction allows the bins to outlast corrugated bins, and allows loading without spreading or cracking. The bin’s rolled ridge provides added strength and durability when filled to maximum capacity. The 6" bins are easy to label for quick inventory identification. In addition, optional width dividers expand sorting options and efficiencies. Bin colors include Red, Blue, Yellow, Green and White.

Designed for use in variety of settings — including assembly, distribution, manufacturing, general maintenance, retail, supply and health care — the 6" bins can be used alone or with Akro-Mils’ steel shelving, wire shelving, pick racks and bench racks to make organization easy and more efficient.
