About Us:

TRU-D SmartUVC™ the signature product of Memphis-based Lumalier, is the only portable UV disinfection system on the market that precisely measures reflected UVC emissions with Sensor360™ to automatically calculate the pathogen-lethal UV dose required for properly cleaning health care environments. The Sensor360™ technology dynamically compensates for room size, shape and other dose altering variables, such as the position of contents, windows, blinds and doors. Third-party, peer-reviewed published data confirms that TRU-D SmartUVC™ is a proven, effective tool that provides touchless germicidal disinfection of all environmental surfaces, eliminating environmental pathogens that can cause HAI's, such as C.diff., acinetobactor, MRSA and VRE.
