Medical Miracle: Toddler Survives 30' Fall

Talk about a tough kid – a California toddler is alive after falling 30' from an apartment window and landing on concrete and rocks. Contra Costa County Fire Captain Charles Thomas said the 22-month-old boy was alert and crying after a three-story plunge that left him with just a cut on his abdomen, a bruised lung and a bump on his head.

The boy appeared to have climbed onto furniture near an open window and fell after pushing against the screen. He landed on concrete and a bed of rocks.
