MM-22C LCD Display

April 23, 2012

TRU-Vu Monitors, Inc. has just released a new 22-inch Medical-Grade LCD display that is optimized for a wide range of medical applications from near-patient monitoring and endoscopic systems to surgical operating rooms. The new MM-22C is a widescreen (16:10 aspect ratio) high-definition (720p HD) color LCD monitor with an ultra-wide 178° x 178° viewing angle, quick response time and brilliant color reproduction.
