Safety Leadwires

This series of leadwires with touch-proof pin terminations satisfies the FDA mandate for safety leadwires. The shrouded 0.080 pins accept all leads with standard 0.080 DIN socket terminations. The pins are over-molded with a polypropylene shrouds and integral strain relief which ensures long use and ease of sterilization. This shrouded pin series contains leads with pin-to-pin, pin-to-socket, and pin-to-alligator clip configurations, and are available in standard colors and lengths.
