## CJD Instrument Set

In response to the growing need for an affordable and disposable CJD (Creutzfeldt-Jacobs Disease) identification set, Spectrum has developed the CJD Instrument Set, comprised entirely of Pakistan made instruments. Instruments include a Hudson Brace, a McKenzie Bur, Gigli wire saw and handles, BiPolar bayonet forceps, standard bayonet forceps, a Foerester Sponge forceps, Metzenbaum and Mayo scissors, a Mayo Hegar needle holder, two sizes of Frazier suction tubes, a Freer periosteal elevator, and four Halsted-Mosquito forceps.
