Enteral Feeding Pump

The KANGAROO ePUMP[®] enteral feeding pump offers major advancements in feeding pump technology. With a software-based, user friendly interface, automatic flushing, anti-free flow technology, and an ability to provide a continuum across care, this enteral feeding pump provides an improved enteral feeding option and quality of life for many patients. The KANGAROO ePUMP delivers formula via rotary peristaltic tension loop pumping to provide nutrition at a controlled rate to a patient's gastrointestinal system for those who do not have the ability to orally ingest food.
