

Wall-Mounted Medical Light

The Celestial Star[®] light is ideal for space-saving and tight quarters. Easy to install and maintain, the light easily attaches to the wall, delivering overhead lighting and converting virtually any room into a "surgical suite." The lightweight Celestial Star has a 29-inch articulating arm, offering a great amount of flexibility and extensive reach, while eliminating the need for costly track lighting. The light folds up to allow access to patients with x-ray or other emergency equipment. Additionally, the Celestial Star lamp head is capable of a 700-degree rotation, and the arm has the rotation capability of 359 degrees from both horizontal and vertical planes.
