Catheter Cart

Essentially a Cath Lab in a cart, this catheter cart holds all sizes of catheters on its fully extendable telescopic catheter holders, with 20 adjustable hooks on each. The catheter module box has 24 compartments for boxes of catheters, and inside modules with partitionable compartments are available to hold virtually anything. The bases are made of rigid ABS plastic for stability, and the side and back panels are made of easy-to-clean, shockproof high-pressure laminate. Available in one, two, and three sections, cart doors are offered in roll-up and hinged configurations. Each cart is equipped with four swivel casters (two with brakes) for easy maneuverability.
