

## General Purpose/Bariatric Surgical Table

**Booth # 401** The Hercules 6700B Surgical Table provides imaging capability for today's most advanced general purpose and bariatric procedures, reducing the need for multiple support accessories and optimizing ease of patient set-ups. The 6700B offers powerful 1,200-pound lift and 1,000-pound articulation, 210-degree top rotation, full body imaging, 24-inch low table height, 30-degree patient articulation with full table functions, removable back and leg sections, an optional carbon fiber back/leg section attachment and/or power shoulder arthroscopy positioner, durable back-lit one-touch pendant control, a full line general purpose and bariatric table accessories, and more.
