

Conforming Bandage

The Apex[®], a conforming gauze bandage, Apex is just the latest in the DeRoyal family of advanced wound care products. Apex is a one-ply polyester and rayon blend that conforms easily to body contours, stretches and clings to itself. Highly absorbent, it maintains its conformability when wet and remains in place even when saturated with drainage. Apex is easy to apply, can be cut, and provides the proper amount of stretch that requires minimal securement. When used as a secondary dressing, it reduces primary dressing displacement when the patient moves or is moved by clinicians. Apex is available in both sterile and non-sterile rolls with generous yardage offerings.
