

Hand Access Laparoscopy System

The GelPort[®] XE device combines the technology of the GelSeal[®] cap with the enhanced circumferential retraction of the Alexis[®] wound retractor. The GelSeal cap enables unlimited hand exchanges without loss of pneumoperitoneum, while the Alexis retractor provides 360 degrees of atraumatic retraction and protection. Unique in its design, only the GelPort XE device's unique provides surgeons with control and versatility.
