

## Wire Storage Products

The QuickWire® of open storage products is ideal for central supply or general bulk storage items in any healthcare facility. QuickWire product include open wire mobile carts, wire shelving racks, and an aisle-saving, high-density floor track system. These storage solutions can be assembled by simply connecting four wire shelves to four metal posts. Mobile units simply require the installation of four casters. Other QuickWire options include preconfigured products such as wire linen carts, wire utility carts, and QuickWall grid panels that accommodate wire shelves and baskets, peg hooks, document holders, and more. Additionally, QuickWire units can be mounted on floor tracks that allow for high-density, aisle saving storage that optimizes floor space.
