

Antimicrobial Swabs

Chlorasrub[®], a new Chlorhexidine Gluconate-based (CHG) product, features 3.15 percent CHG and 70 percent Isopropyl Alcohol in Swab and Swabstick delivery systems, to address customer demand for ease of use and affordability. Chlorasrub can be used for a variety of antiseptic skin preparation needs such as peripheral IV's, blood cultures and minor surgical procedures. PDI's Chlorasrub products will be available in October 2005.
