## Headlight System

Prescott's is now offering a 300-WATT XENON Headlight System. The 300-watt Xenon LIGHTSOURCE delivers bright, white light that shows the true tissue color. It's four port turret, which includes a Zeiss/Leica port, provides easy connectivity and adaptability to other instruments. The HEADPIECE features an adjustable headband with lightweight design and an adjustable spot with 10 mm to 100 mm variable light field. The system also includes a mobile floor stand with an integrated dual hanger to support the headpiece and fiberoptic cable.
