Anesthesia Cart

The Metro Starsys™ Anesthesia Cart provides a highly organized, easy-to-customize storage and transport solution for anesthesia supplies and equipment. The cart allows supplies to be secured within a single locked drawer or throughout the entire unit. An optional electronic locking system provides keyless entry, auto-locking, and secured access. Full extension drawers with removable totes provide convenient access and renewal. Drawer dividers are available to organize supplies for easy access, and an overbridge provides additional storage to keep the work surface clear. Additional workspace is provided by two swing-out side storage units that fully retract to reduce occupied floor space when not being used.
