## Scalpel Blade Remover

The QuickSmart Scalpel Blade Remover is a safe, convenient, compatible, and extremely easy to use device. The flask and mounting bracket which is fixed either to a bench, a wall or a trolley offers healthcare personnel a safe alternative to conventional scalpel blade removal. The scalpel handle and blade is inserted into the slot in the flask and advanced until the 'CLICK' is heard. The handle is withdrawn and the blade remains sealed inside the leak-proof flask for later disposal. The flask will hold up to 100 Sharps that can then be disposed of appropriately.
