

Transfer Sheet from Sloan Medical

Transferring a patient from surface to surface can be difficult, especially if the patient is unable to help in the transfer. The EZ Glide[®] transfer sheet allows you to transfer a patient easily and effortlessly. The EZ Glide transfer sheet facilitates the smooth transfer with less effort and potential for injury of the medical professional and without the discomfort or injury of the patient. The transfer sheet is virtually weightless, eliminating the need to pick up and carry a bulky transfer board.

The EZ Glide transfer sheet is disposable which lessens the potential for cross-contamination. The EZ Glide transfer sheet is packed 10 sheets to a cartridges. Each cartridge conveniently attaches to your table or gurney with velcro straps. This allows the transfer sheet to be available immediately when needed.
