Needle Counter Box

The AMI Sharps Safety Station[®] needle counter box features three safety hinges that can be unhinged easily without breaking should the user wish to separate the boxes to use as a neutral zone. Auto-lock snaps easily close and reopen for recount if necessary, while overlapping walls keep sharps securely in the box. The box also provides two spaces for safely holding scalpels, a user friendly one-handed scalpel blade remover, and a built-in syringe holder with one-handed operation of the needle recapping and one-handed for exchanging needles. All size boxes are available with magnetic, foam block, foam strip, and adhesive surfaces.
