## Full Face Shields

Designed for improved air flow, extra comfort, and full eye and face protection, FACE-SAVER chin length full face shields provide 13 inches of crystal clear, wrap around eye and face protection. Heat and moisture build up, which causes trouble for most face shields, is efficiently redirected away from the surgeon's or surgical nurse's face through the simple, yet effective Cool Vent Air Flow System, creating a cooler, more comfortable work environment. Extra comfort is achieved with a thick, hypoallergenic, moisture absorbing foam brow pad that gently cushions the face, while locking the face shield firmly in place.
