

High-Capacity Surgical Table

Booth # 3023 The MAQUET Alphamaxx Surgical Table is designed to accommodate all types of laparoscopic procedures. With a 1,000-pound weight capacity and full articulation in both normal and reverse modes, the Alphamaxx can help OR Managers to meet the dual challenge of patient ergonomics and bariatric procedure scheduling. Dual articulating split leg plates minimize set-up time and provide optimal surgical access. The MAQUET Alphamaxx comes standard with an auto-drive that makes relocation easy and effortless.
