

## Scope Storage System

**Booth 2803** The Easy Reach Scope Manager, a patent-pending scope storage system, that brings scopes to an easy to access level. Easy Reach uses a specially designed counterbalanced scope support that lowers scopes to an easy, reachable level without step stools or standing on tip-toes. When placing scopes in storage, scopes are simply placed on the Easy Reach and returned to the upright position allowing scopes to hang straight. With the Easy Reach, scopes are stored properly, safely, and easily. Easy Reach Scope Managers are available in standard InnerSpace scope cabinets.
