

## Online Custom Chair Service

BioFit<sup>®</sup> Engineered Products introduces the seating industry's first online Build Your Own Chair Configurator for designing ergonomic chairs to meet customer specifications for hospitals and other healthcare applications. Visitors to the BioFit website can use the Build Your Own Chair Configurator to assemble chairs that meet their specific needs. Customers can see how different chair components and options would look and perform in their particular applications. After a new chair is configured online, a customer can email the result to BioFit for a price quote within one working day.
