

Portable LED Lightsource

The LLS-3LB Rover 3W LED Lightsource is a compact, portable source of brilliant, daylight-quality light. This innovative lightsource connects directly to an endoscope post via the standard integral ACMI port. Ideal for ENT office and field applications, the Rover provides upwards of 100,000 hours of 5500-degree K light. At just five inches long and with a diameter of 3.2 cm, this battery-operated LED lightsource is convenient and easy to use.
