

Elastic Stays

Booth # 3943 The 3511 Elastic Stay has all the same functions of the 3311, in addition to some improved features. It has the same tensile strength and hook size to allow retraction of tissue. The new ergonomically designed head on the 3511 is engineered to let surgeons and nurses have a more secure grip of the Stay. Moreover, the vivid blue color provides greater visibility in the surgical site.
