## **Customized Medication Label System**

The Patient SAF-T Label System™ is a use-friendly system allows users to customize medication labels online at <a href="www.ORmedlabels.com">www.ORmedlabels.com</a> [1], via phone or via fax, and receive a free sample of your custom labels. There are a variety of label options to chose from such as label background color, text color, text, preprinted labels, blank labels, large labels (medicine cups, bowls and basins), small labels (syringes), or a combination of these with no limit on sheets per pack. This system provides the ability to completely customize labels by surgical specialty. The custom labels feature a high quality adhesive with a unique coating which prevents ink from smearing or labels detaching even when exposed to water.
