

Waterproof Medication Labels

Presource® Standard Medication Label Sheets help health-care providers comply with Requirement 3D of the JCAHO 2006 National Patient Goals. These waterproof label sheets meet the varying needs of the Operating Room, Labor and Delivery, and the Catheterization and Electrophysiology Labs. The labels can be placed in custom procedure packs or purchased as single sterile items. They are available with and without a location for date and initials to meet each hospital's individual implementation plans.
