

Electrosurgical Coagulator

The Aura[®]Plus 70-watt irrigating bipolar electrosurgical coagulator features an LCD touch screen that can be intensified or reduced for optimal viewing. The touch-pad controls complement the unit allowing the user to easily adjust settings. The output level is displayed in both watts and Malis[®] units with power settings ranging from 0-70 watts. The footswitch is capable of controlling power only, irrigation only, or both power and irrigation. This unit also has a peristaltic irrigation pump with an adjustable flow rate ranging from 0 - 50 CCs per minute, and the stand is conveniently located on the back of the unit for holding the irrigation bag.
