## Hand/Wrist Support Pad

The ACTION<sup>®</sup> Hand/ Wrist Support Pad provides superior hand and wrist stabilization and accessibility for a variety of procedures such as Carpel Tunnel, Arterial Canalization and Dialysis. This support also ideally positions the hand/wrist for harvesting the Radial Artery during Coronary Bypass surgery. The soft visco-foam core is encapsulated by a layer of Akton<sup>®</sup> polymer. Two detachable straps are included to secure the arm, and each also incorporate a protective layer of AKTON polymer.
