

Alternating Pressure Overlay

The Lumex® AltaDyne® Five-Inch Alternating Pressure / Low Air Loss Overlay System is a portable, less costly option for alternating pressure mattress replacement systems in the prevention and treatment of pressure ulcers. It is an effective pressure management option for both homecare and long-term care settings alike. Its features a lightweight, durable Nylon/Polyurethane construction, nine laser-cut low air loss cells in the sacral region to keep patient cool and dry, and a 265-pound weight capacity. It also offers a patient-adjustable pump to control softness and firmness as well as normal (target) and low-pressure indicators.
