Foam Mattresses

The Lumex® Gold Care Plus Foam Mattress Series is designed and to prevent and treat stage I and II pressure ulcers. The mattresses feature four separate, anatomically matched support zones that enhance patient comfort while reducing tissue interface pressure. The breathable zippered cover's SOFlux nylon top is fluid proof, flame retardant, antimicrobial, antistatic, and easy to clean. It also moves with the patient to reduce shearing. With a weight capacity of 400 pounds, the mattresses are available in 76-inch and 80-inch lengths, and are 35 inches wide and six inches deep at the head.
