

MRI Surgical Light

Featuring MRI compatibility, excellent flexibility and reach, high performance, and a space saving design, the Celestial Star[®]153 MRI surgical light meets the demanding requirements of MRI surgical suite use. The light's features include a drift free balance arm design, unlimited positioning and optimal flexibility around the bore and a 114-inch vertical and horizontal reach for head-to-toe coverage. It delivers up to 64,500 Lux with three 35-Watt long-life halogen bulbs. Meeting medical standard FDA Class II, the light is available in a single or dual ceiling lamp configuration or as a mobile unit.
