

Sterilization Containers in Varying Sizes

The V. Mueller® brand Genesis® sterilization container family includes all of the sizes you need to sterilize and protect your delicate instruments. The container line features, mini-, quarter-, half-, mid- and full-size containers, as well as extra-long and deep lid containers, specially designed for today's oversized laparoscopic or bariatric instrument sets and trays. Sterrad® system-compatible Genesis containers are also available to help simplify and standardize sterilization packaging requirements with just one container system.
