

Surface Disinfectant Wipes

BLEACH WIPE® Disinfectant Wipes now kill TB, HBV, MRSA, VRE and HIV-1 in one application. These EPA-Registered wipes are non-corrosive, non-staining and are pH balanced for safe use on all metal and stainless steel surfaces. BLEACH-WIPE products are manufactured with a 5.25 percent Sodium Hypochlorite solution already diluted in accordance with the CDC Bloodborne Pathogen Mandate. The precise and consistent dilution enhances compliance with infection control protocols, while the specially designed packaging provides an 14-month shelf life for increased inventory control. BLEACH WIPE is available in an 8- by 10-inch and 14- by 14-inch sizes for larger clean ups in the OR. This product is also available in a 3- by 3-inch size for cleaning glucometers and other point-of-care equipment.
