

Disposable Apparel

BARRIER wearing apparel features an extensive range of single-use items for personal protection including disposable scrubs, masks, headwear, glasses and goggles. The disposable scrubs are made from a proprietary non-woven material which rivals cotton in comfort and wearability, with sizes from small to 4XL. The disposable scrubs offer a cost effective alternative to laundering of traditional cotton scrubs. They also meet current regulations requiring that contaminated clothing not be removed over the head, but rather cut from the body. BARRIER masks have extra long ties and extra width for optimal facial coverage minimizing breathing resistance and maximizing comfort.
