

Medical Grade Photo Printer

The UP-D75MD color 8- by 10-inch digital dye sublimation printer offers high-quality photo prints. With a high resolution of 300 dpi, combined with an easy to use interface, the printer is ideal for medical professionals requiring high-quality images and nuclear medicine applications that do not require a DICOM interface. With a print speed of 80 seconds, the UP-D75MD produced color prints on water-resistant, self-laminating media. The printer's USB 2.0 high speed Interface helps improve work flow, while the improved thermal print head provides longer life and high efficiency.
