

Acute Care Lighting System

The Harmony[®] LC Lighting System brings together premium lighting and selected features to provide a high-quality surgical lighting system for outpatient and acute care facilities. The system can be configured with up to three Harmony 500 lightheads with patented WaveLens[®] technology, which can be ordered with or without an in-light camera. Up to four flat-panel monitors can also be added, and the system includes a compact, flush-mounted control panel with camera control and LED indicators. The dual cardanic suspension system includes spring arms with removable panels for easy cable installation. The Harmony LC is ideal for facilities that requiring high quality surgical lighting and video capability.
