

Latex-Free Face Masks

Protection Plus[®] Face Masks are made from a soft spunbonded material that is latex- and fiberglass-free. The soft inner lining helps protect the face from irritation and keeps the wearer comfortable for extended periods of time. The masks are available in earloop, tie-on and cone shape styles and in a variety of colors. Boasting a Bacterial Filtration Efficiency of over 99 percent, they are also available with a clear plastic face shield to protect the wearer from harmful splashes or bloodborne pathogens.
