

Pediatric Hook Liver Retractor

Published on Surgical Products (<http://www.surgicalproductsmag.com>)

Pediatric Hook Liver Retractor

These unique, patent-pending Pediatric Hooks Retractor were designed for use with the company's proprietary Iron Intern instrument holder in minimally invasive surgery. The new design takes into consideration the anatomy of the pediatric patient. The hooks provide for easy insertion through the abdominal wall to retract the liver in pediatric surgery. These retractors are available as a set of two (small and medium).
