

Colon Hydrotherapy System

Angel of Water[®] CM-1 is a professional colon hydrotherapy system that offers a safe, hygienic and comfortable way to irrigate the colon prior to endoscopic exams, radiological exams and other medical procedures. Colonic irrigation with the CM-1 allows temperature-controlled purified water to flow, by gravity feed from the integral system reservoir through a sterile, single-use nozzle into the rectum in order to evacuate and cleanse colon contents. A typical session with the system lasts 30 to 40 minutes and uses approximately 12 gallons of water.
