

Low Air Loss Mattress System

The LumexAir[®] 153 II Low Air Loss Mattress System utilizes a high volume blower to provide excellent ventilation and reduce the moisture build-up that can cause skin maceration. The mattress system features an AutoFirm function to inflate the mattress quickly; a vapor-permeable, fluid resistant cover; three different pressure zones (head, body, and leg) combined with six comfort level adjustments for an individual fit; a pulsation feature that provides gentle circulation-stimulating massage; a slip resistant mat and securing straps; a panel lock function to prevent persons other than caregivers from changing settings; emergency CPR quick-disconnect for quick deflation and visible and audible alarms.
