

Ultrasound & Imaging Table

Biodex Medical Systems has completely redesigned the popular Ultra Pro and Echo Pro tables to create a new concept in imaging tables: the Sound Pro. The Sound Pro table incorporates the imaging features of both the ultrasound and echocardiography tables combined. Fully loaded with ultrasound and echocardiography capabilities, the Sound Pro Combination Table offers a 30-inch width, 500-pound patient weight capacity and a height range from 23 inches to 39 inches; ideal for the bariatric market. Ergonomically designed to suit both patient and sonographer, all table adjustments are accomplished with either a hand or foot controller and allow scanning from a seated or standing position.
