

Alternating Pressure Mattress System

The AltaDyne[®] XT Alternating Pressure/Low Air Loss Mattress System provides both low air loss and alternating pressure therapy, with pressure and alternating cycle time adjustable from five to twenty minutes in five-minute increments, and six options for mattress pressure. The AltaDyne XT also comes with a host of practical safety features including vapor-permeable, fluid resistant cover; an AutoFirm function to inflate the mattress quickly; emergency CPR quick-disconnect for quick deflation; patented cell-in-cell design to prevent bottoming out in case of power failure; an easy-to-use digital controller with panel lock function to prevent persons other than caregivers from changing settings and visible and audible alarms. The mattress systems are available in two configurations: 34-inch width with 396-pound weight capacity or 42-inch width with 800-pound weight capacity.
