## Ankle Brace

The X8 ankle brace features exclusive twin dual-purpose straps that can be applied quicker and easier than those utilized by other braces currently in use. The twin dual purpose straps allow easy readjustment of support levels, and are specially designed to secure both on the brace and on each other, providing a tight fit around the entire ankle. The full elastic back of the brace ensures unrestricted blood flow to the Achilles' tendon and virtually eliminates the chance for blisters, while the seamless arch eliminates irritation to the bottom of the foot.
