Fascia Closure Device

The SuturTek 360[®] Fascia Closure Device[®] protects surgeons, OR nurses and patients against suture needlesticks and potentially deadly bloodborne infections. Its proprietary, disposable suture cartridge aids in protecting against suture needlesticks by isolating the sharp point of the needle during loading, passing, suturing, and disposal. The device delivers Gold Standard closure because it Sutures Like a Surgeon[®], precisely replicating traditional hand suturing technique and placing all types of standard continuous or interrupted stitches.
