

## Radiolucent Table Extensions

This 36-inch carbon fiber back or leg table extension provides completely metal free imaging of upper and/or lower body surgical procedures with a C-arm. The extension is light weight and easy to install on several Skytron surgical tables, including the Hercules 6700B and UltraSlide 3600B. It is an ideal imaging enhancement tool for endovascular procedures, non-traction orthopedic procedures, pain management procedures and many others.
