

Safety Seals & Sets

EPS has added a number of new styles and sizes to its growing line of tamper-evident Safety Seals and Sets. In addition to their existing metal safety links and locks, they have designed a bright red bio-hazard seal for the safe securing of hazardous waste. The new Pull-Thru Seals for crash carts and emergency drug boxes is also available. In addition, an expanded variety of Plastic Padlock Seals had introduced to include both long and short hasps. All Plastic Padlock Seals are available either numbered or unnumbered.
