## Bouffant Caps

These lightweight bouffant caps are made from a breathable spunbond polypropylene material. They are available in three sizes (21 inches, 24 inches and 27 inches) and come in blue, white, green or Precept's own designer print. The non-irritating elastic ensures a snug yet comfortable fit. The latex-free bouffant caps are packaged in dispenser boxes for easy distribution and complement the company's line of surgical caps and hoods.
